Adobe Firefly is a creative generation platform powered by artificial intelligence (AI), designed to enable users to create and edit images, text effects, illustrations, and other visual content using text commands or simple tools. Firefly focuses on democratizing access to visual content

creation, making AI accessible to designers and creators of all levels. You can generate high-quality images, add creative effects, and customize graphic content without needing to be an expert in design or advanced Adobe tools. The platform allows users to experiment with generative graphics and interactively edit their content within browsers, with results that can be integrated into other Adobe tools, such as Photoshop and Illustrator.

This product includes a license linked to your user account. It lasts for three months and covers one PC per license.

Compatibility:

Adobe Firefly Requirements:

Operating System:

- Adobe Firefly is a web-based application, so no software installation is required on the local operating system. You only need a compatible browser.

Processor:

- No specific processor is required since all processing is performed in the cloud.

RAM:

- Minimum: 4 GB (sufficient for standard browser use).
- Recommended: 8 GB or more to handle multiple tabs and other resources in parallel.

Disk Space:

- No disk space is required for software installation, but sufficient space is recommended to store generated results if downloaded.

Screen Resolution:

- Minimum: 1280 x 720.
- Recommended: 1920 x 1080 or higher to visualize details of generated images.

Internet Connection:

- A stable and fast Internet connection is required, as Adobe Firefly runs entirely in the cloud.
